ABSTRACT:

PROBLEM TO BE SOLVED: To obtain a gel composition, cosmetic, or the like, having excellent dispersibility and stability of a pigment and/or a filler and exhibiting good appearance even by including a relatively large amount of the pigment and/or the filler.

SOLUTION: The objective gel composition is composed of a combination of a polyacrylamide polymer with a pigment and/or a filler surface-treated with a fluorine compound such as a perfluoroalkyl phosphate or a water and oil repelling agent such as an acrylated amino acid.
